Company is authorized to contract
any obligation in the name of the
company, or to make purchases in
order algaed by the PUBLISHER OF THE DAILY PRESS.

SATURDAY, JULY 9, 1910.

TAKE THE ANTI-MOSQUITO CAM PAIGN SERIOUSLY.

Practical results will be accomplished in Norfolk's campaign against mosquitoes because the people of the city are taking the campaign serious ly. The health departments, no mat ter how active and conscientious in their work they may be, can do very little toward exterminating the pest unless they have real support as well as, mere approval from the public. Over in Norfolk Tixirsday a delegation of Sixth ward citizens appeared before the board of control with bottled "wigglo-tails" and exhibits, with which they proceeded to prove in short or der the necessity for work on the part of the health department force this neighborhood. Consequently, before the board adjourned, orders had gone forth for the "oiling" of certain mosquito breeding holes and the removal of garbage from the Sixth ward daily instead of three times a week. It is true, judging from the newspaper reports, that this Sixth constantly passing the part carried ward delegation lambasted the health away by the ocean currents would be department and accused the officers department and accused the officers of falling to do their duty. Citizen with a grievance will do these things but only two frequently they satisfy themselves by "cussing out" the au-

thorities without making any definite

people knew better, and they got re-

Here in Newport News Dr. T. J. Pretlow, the retiring health officer has inaugurated a campaign agains mos itoes which, we have no doubt will be taken up by his successor, Dr. Aaron Jeffery, when he assumes the office. Neither Dr. Pretlow nor Dr Jeffery can wage this campaign effectively without the health of the residents of every section of the city Holes filled with water, piles of tab should be brought to the attention of the department by any citizen es them. Of course many such raisances will be observed by employes of the department, but many rs will be overlooked and without attention unless the publigives the information. The health officer and the members of the board of health will not object to legitimate compaints and will be glad to receive his newly discovered Martian canals afformation. The only complaints they will resent will be those of people who stand on street corners abusing the authorities without using the internal background of the cast of the Syrtis Major, where no canal had ever previously been seen.

St. Louis & San Fran. 2nd pfd 41 The money market attracted but St. Louis Southwestern. 2st Louis Southwestern pfd .65 the east of the Syrtis Major, where no canal had ever previously been seen. as a partial effect to the payments to canal had ever previously been seen. as a partial effect to the payments to Southwestern pfd .65 Southwester

he had it "all fixed" before the promoters' bids for the fight were opened. In the intersew Mr. Rickard tell, apparently with no little pride, of how he, with the aid of Johnson and Jeffries, gave his competitors "the double cross." He says he paid Jeffries \$10,000 and Johnson \$19,000 telling each to say nothing to the other the other "competitors arranging to submit bids,

All of which shows that the morn perspective of the "big" men in the field of professional sports is juswhat it is among the small fry, No body ever hourd of a one-horse wres ling or boxing match being strictly One Month 50

only too often they do not stop to in quire by what means that prominence was attained.

Ballinger says he is "not a quitter, Certainly he won't quit until he thrown out.

OILING THE AMANTIC.

Pouring oil on the troubled waters will be much more than a metaphor if a plan offered by the United States hydographic office is carried out. Its serious proposal is to keep the path between New York and the northeru European ports well olled so that the waves may be kept down and passer gers may cross in perfect comfort.

The hydrographic office knows a lo

about waves and claims that nothing is so bad for 'em as ell. Moreover, oll, spreads quickly and thinly over the water, and hence the calming can be done at small expense. A quart of cheap petroleum an hour for each ship would, they say, do the work in de-cent weather, and \$25 per trip ought to cover it easily. With the big liner-

Maybe some day we shall have a wrecking crew to repair mideeaa washouts in the oil track. Meanwille the hydrographic office will need more than crude cil to calm the storm of ridicule which this plan of theirs has effort to secure relief. The Sixth ward awakened. Veteran sea captains claim people knew better, and they got rethat they have never yet seen an ocean that would hold still long enough to be oiled.-Success Magazine.

The campaign for the extension of our knowledge of the magnetism of earth is to be extended into the sen's north point expedition, which is to start from Norway this summer in Nansen's former ship, the Fram. An American observer, Dr. Harry Ed-monds, has been selected to accompany the expedition for this special purpose. Amundsen's plan is to enter the pola basin by way of Bering strait and then drift with the ice. While it is not bispecial object to attain the pole, he hopes that the course of the drift may take him across or close to it. The increase of geographical knowledge is his aim, and he expects o be absent about four years.—Youth's Companion

formation they may have, if any, to practical advantage.

Individual property owners can render the department the greatest assistance by keeping the promises owned by them free from unsanitary and objectionable conditions. The cutting of weeds and filling of water holes premptly will help more than anything else.

In this connection it might be added that some weed cutting by the street department would mightly improve the condition of upper Washington avenue.
